Seeing Red: Why Friends Don't Let Friend's Plant Burning Bush

June 30 1 - 2:30 pm

Millions of acres are lost annually to non-native invasive plants. Learn why removing these plants from our own yards can help restore ecological balance to our neighborhoods and other wild areas.

Native Plants: Handsome Is as Handsome Does

July 14 1 - 2:30 pm

Native plants are not just another pretty addition to your garden. Discover the ecological importance of our native plants and how we can recapture native habitats in our own gardens.

Gardening Under the Stars: Saving Our Nocturnal Pollinators

July 28 1 - 2:30 pm

Outdoor lighting is causing serious harm to nocturnal animals, migrating birds, insects, as well as our own health. Learn how and why we should make our gardens more attractive to nighttime wildlife.

Gardening for Bees, Butterflies & Other Pollinators

August 11 1 - 2:30 pm

Pollinators need our help. Learn about our many native pollinators, how they help keep our ecosystems healthy, and how you can manage your garden to provide just what they need.

Gardening with Frog & Toad

September 1 1 - 2:30 pm

A garden filled with the peeps, trills, quacks, or croaks from our native frogs and toads is one of the best ways to judge the health of our local ecosystem. Learn how you can help our local amphibians.

Critters in the Garden

September 15 1 - 2 pm

Chipmunks, rabbits, and deer – oh my! No matter how much we enjoy wildlife many of these creatures can wreak havoc in our gardens. Learn how to humanely co-exist with them.

Butterfly Gardens Are for The Birds

September 29 1 - 2:30 pm

Butterfly gardens attract a host of beautiful, winged creatures to your yard, not just butterflies. Find out what makes a successful butterfly habitat and why they support our feathered friends.
